

**IN THE CLAIMS:**

Please amend claims 1 and 2 as follows:

---

1           **1.**     A disposable lid for a cup comprising an annular clamp adapted to be seated  
2     on a rim of the cup, said clamp having inner and outer lips to grip inner and outer walls of  
3     a lip of the cup inserted therebetween and a spout extending upwardly from a top of said  
4     clamp to a discharge port at an apex thereof, an inner wall of said clamp and an inner wall  
5     of said spout converging smoothly to said discharge port, said spout being entirely above  
6     said clamp.

1           **2.**     A disposable lid for a cup comprising an annular clamp adapted to be seated  
2     on a rim of the cup, said clamp having inner and outer lips to grip inner and outer walls of  
3     a lip of the cup inserted therebetween and a frustoconical spout extending upwardly from  
4     said rim to a discharge port at an apex thereof, said spout having a truncation in the shape  
5     of a horizontal plane tangent to a bottom wall of a horizontal cylinder and a base inside  
6     diameter equal to a top inside diameter of said clamp wherein an inner wall of said clamp  
7     and an inner wall of said spout converge smoothly to said discharge port.
